Upgrade the email clouding service platform to support EAI,
which brings **millions EAI users**.

Protocol & Standards

UTF 8 is a variable-width encoding that can represent every character in the Unicode character set.

- RFC 6531 When using SMTP for sending email, UTF8 SMTP is able to accept email with UTF-8 heading
- RFC 6532 direct use UTF-8 code in mime
- RFC 6855 IMAP support UTF-8
- RFC 6856 POP3 support UTF-8

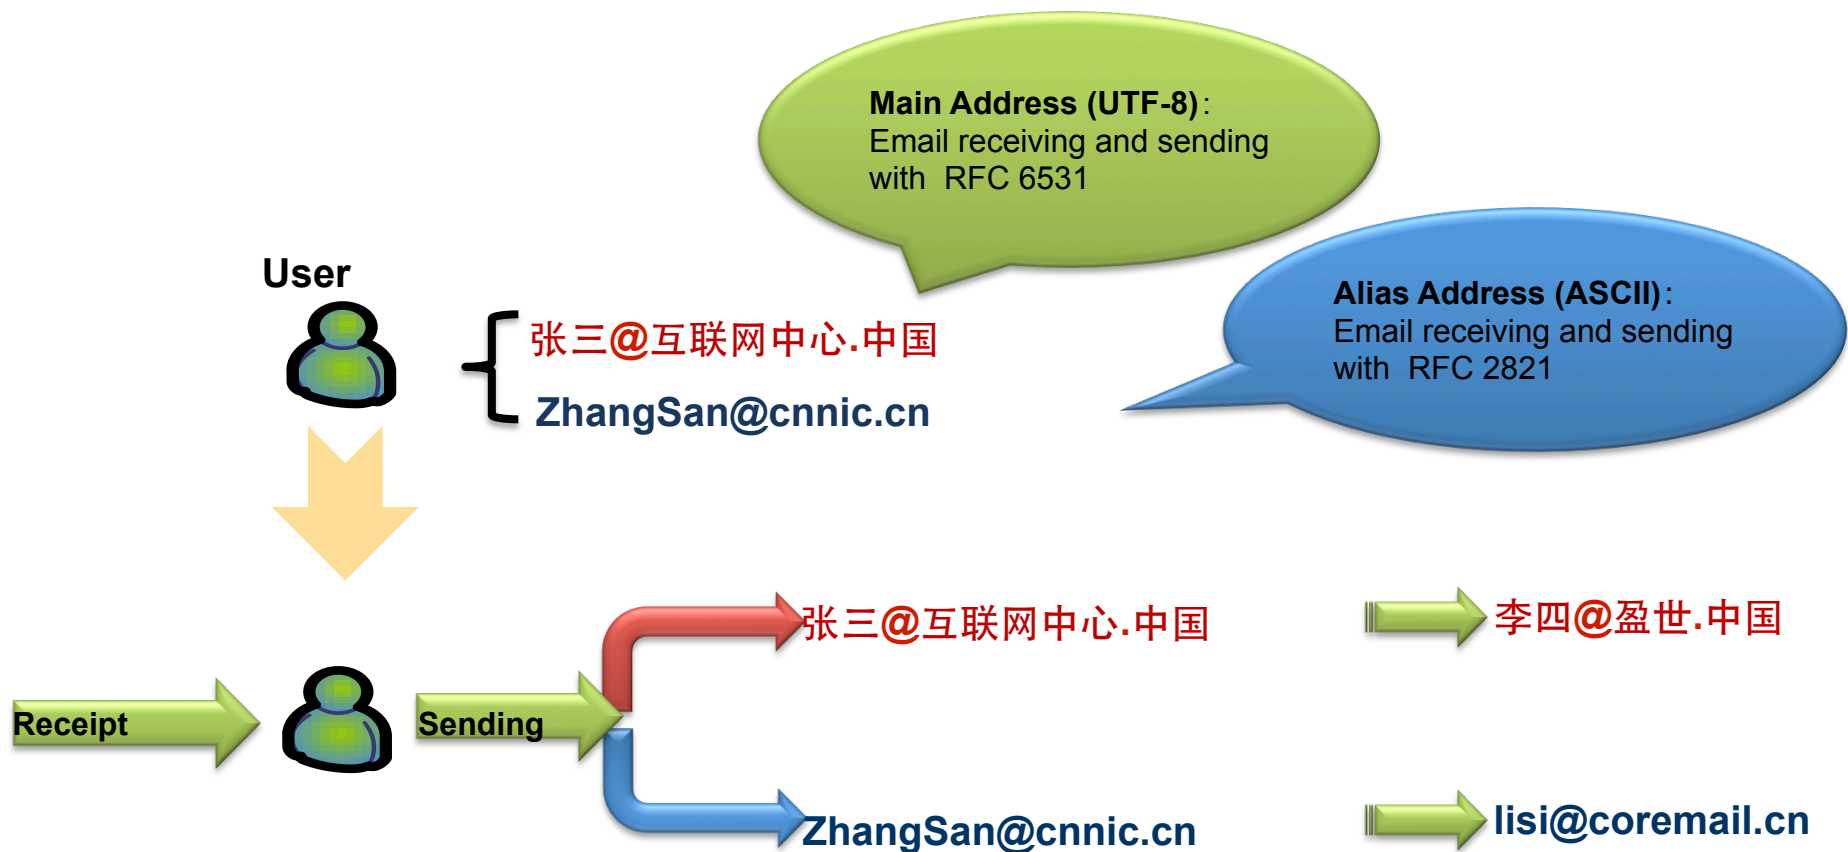

How to implement EAI

System Reconstruction

How to implement EAI

Double Email Addresses

How to implement EAI

Double Email Addresses

Smart switch Chinese sender to English sender

When you send to someone's email which does not support EAI, Coremail will automatically switch Chinese sender to English sender (alias).

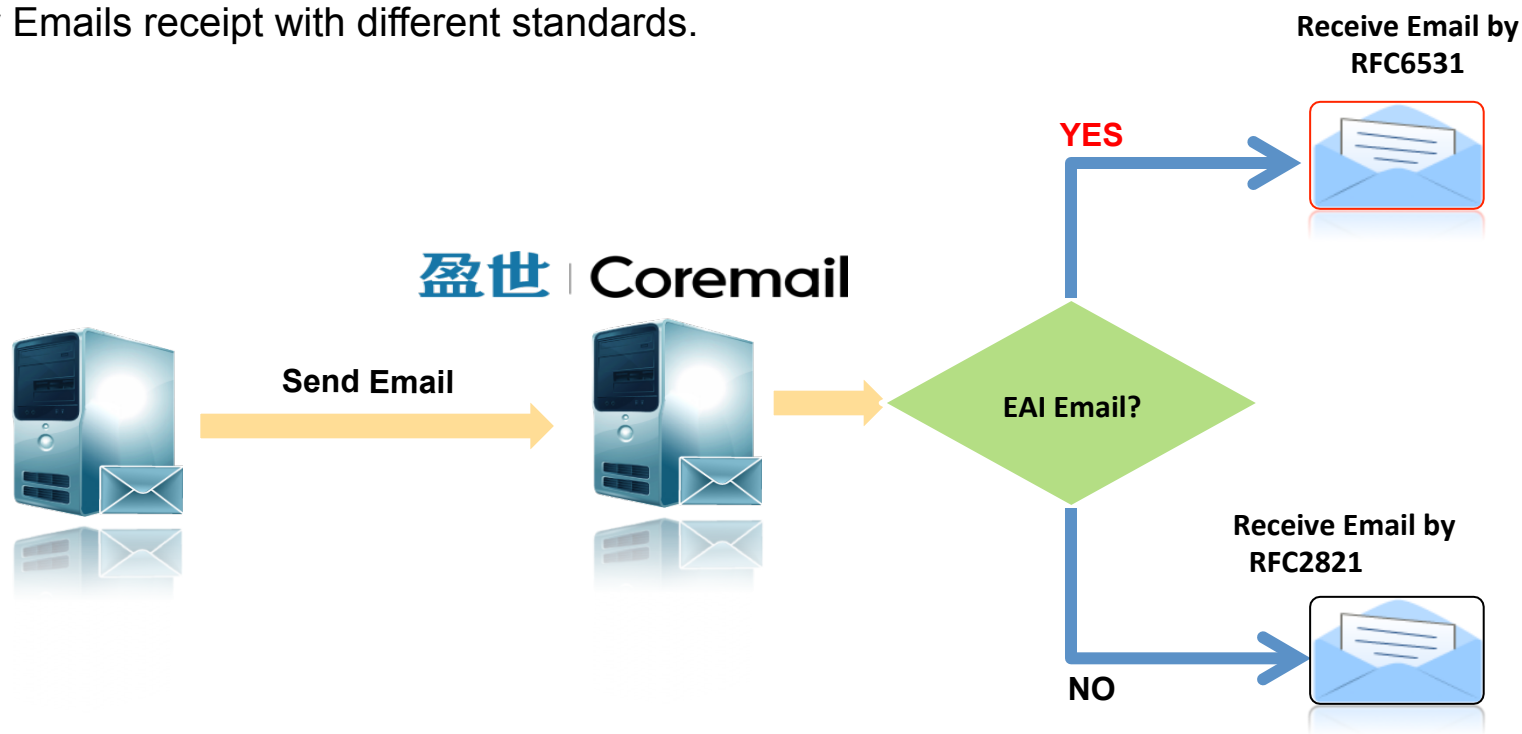

The image shows an email composition window. The 'From' field contains '张三@盈世.中国' and has a dropdown arrow icon highlighted with a red box. The dropdown menu is open, showing 'zhangsan@coremail.china' as the selected option. The 'To' field contains '张三@盈世.中国'. The 'Cc' field contains three entries: '王五@盈世.中国 + x', 'lisi@mailtech.cn + x', and '王毅@外交部.中国 + x'. The 'Subject' field contains 'Welcome to use IDN Email'.

From : 张三@盈世.中国
zhangsan@coremail.china
To : 张三@盈世.中国
Cc : 王五@盈世.中国 + x lisi@mailtech.cn + x 王毅@外交部.中国 + x
Subject : Welcome to use IDN Email

How to implement EAI

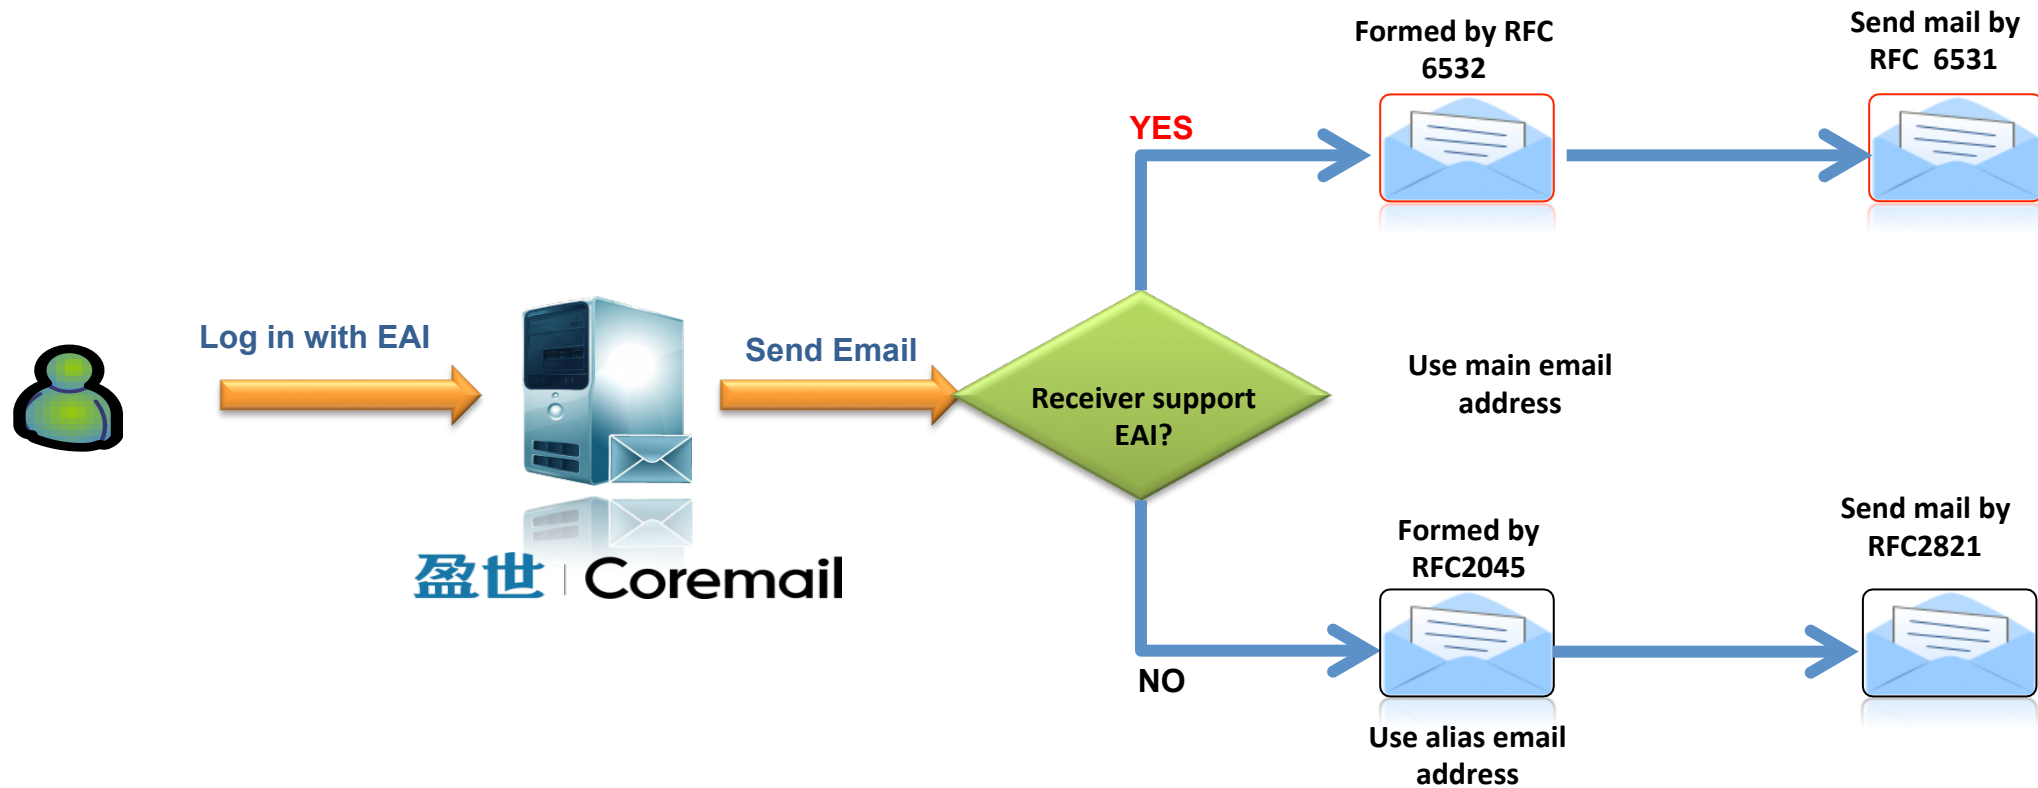

Receive Email

Coremail will classify Emails receipt with different standards.

How to implement EAI

Send Email

How to implement EAI

User Experience Optimization

Smart switch full-width to half-width

When you log in webmail or fill in the recipient with Chinese domain name, it supports that the Chinese full stop will automatically switch to English period.

EAI Challenges

More email operators to support EAI

More Clients to support EAI

System compatibility for EAI is not enough.

Thank you!
